c -!- FUNCTION: Receptor that may have an important role in cell/cell signaling during nervous system formation.

C -!- SUBCELLUAR LOCATION: Membrane; multi-pass membrane protein.

C -!- TISSUE SPECIFICITY: Expressed in the brain, where it is localized principally in the ependymal cell layer, choroid plexus and the principally in the ependymal cell layer, choroid plexus and the carea postrema. Also found in spinal chord and in the eye.

C -!- DEVELOPMENTAL STAGE: First detected at E6. Predominantly expressed in the developing CNS, the emerging dorsal root ganglia and cranial ganglia. In the CNS, expression is uniform along the rostrocaudal axis. During gastrulation, it is expressed in the vicinity of the primitive streak, and becomes predominant in that area at late gastrulation. At E10, detected in ventricular zones (VZ), but not in marginal zones (MZ), and weakly in other structures. Between E12 and E15, a high expression is present in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  CELR1 MOUSE
